Welcome

[Logout](#)[Welcome](#)

House icons represent orphanage locations and relative size.

On mouse over, they should increase in size, and display the number of children with a breakdown of at risk/healthy.

Only users with specific permissions/roles will be allowed to select houses. When they do, it will take them to the detail page for that orphanage as detailed ^

Orphanage Detail

Orphanage: OName

Administrator: Name

Location: Lima

Girls: 23

Boys: 13

At Risk: 5

Active Children

Name, Age, Gender

Inactive Children

Each Image is clickable, and includes the name, age, and gender of the child as subtext. The borders reflect the child's health status in the four areas: Sociale, Psicologico, Medico, and Odontologico; red being at risk, yellow being borderline, green being healthy. The algorithm to determine these states is yet to be determined.

When a child's image is moused over, small icons should show allowing the user to view details or inactivate the child (if they are active, activate the child if they are inactive). On click of the image, the page will go to the child detail screen. Only users with specific permissions will be able to do this.
